

There are more important things to spend your time on than worrying about what XM is doing.

XM Radio is the best thing that has come along since the radio itself. It has great content 24/7 with no commercials. I can listen to my favorite music from city to city, state to state. Not to mention the best Traffic and weather on the radio... real time! Its up to date and constant. I don't have to jump from station to station to find out traffic issues.

Think about this... just think how much safer our roads can be if everyone used XM. No reaching over constantly changing channels looking for music or changing CDs.

FCC, deal with stuff that really effects the airways. Leave the pioneering and great innovative thinking alone. Its a great idea and a great product offering. Leave XM alone.
